

NOTICE OF PROPOSED AWARD

Alternative and Renewable Fuel and Vehicle Technology Program

Grant Solicitation PON-12-605 Natural Gas Fueling Infrastructure March 18, 2013

On November 29, 2012, the California Energy Commission (Energy Commission) released a Grant Solicitation and Application Package entitled "Natural Gas Fueling Infrastructure" under the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP). This competitive grant solicitation was an offer to fund projects that establish infrastructure necessary to store, distribute and dispense compressed or liquefied natural gas.

The grant solicitation announced that the maximum funding available for this solicitation was \$2,596,000 in Fiscal Year 2011-2012 and that the Energy Commission reserved the right to increase this amount up to \$5 million. The Energy Commission must complete environmental review under CEQA and approve each grant at a business meeting prior to the applicable encumbrance deadline. Thus, if a project cannot complete CEQA review in time to meet the applicable encumbrance deadline, the Energy Commission reserves the right to cancel the proposed award and recommend funding to the next highest scoring award that can meet the encumbrance deadline.

The attached table, "Notice of Proposed Awards", identifies each applicant selected and recommended for funding by Energy Commission staff, and includes the amount of recommended funding and score. This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission's web site at: <http://www.energy.ca.gov/contracts/index.html>.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Business Meeting at the Energy Commission in Sacramento, California, and execution of a grant agreement.
